

**1. Conducator de doctorat:**

Prof. Dr. abil. Alina Diana Zamfir

**2. Scurta descriere a domeniului de cercetare:**

Domeniul de cercetare este *spectrometria de masa aplicata la studii biomedicale* si urmareste dezvoltarea de metode si protocoale inovative, bazate pe spectrometrie de masa si tehnici de separare complementare, pentru screening-ul, analiza structurala si identificarea biomoleculelor cu rol de marker in matrici biologice.

**3. Tema de cercetare pentru studiul doctoral si bibliografia aferenta:**

*Dezvoltarea spectrometriei de masa in tandem pentru analiza detaliata a structurii glicanilor in matrici umane*

**4. Teme propuse pentru proba de specialitate la admitere si bibliografia aferenta (de regula 5 subiecte)**

1. Ionizarea prin electrospray

2. Analizorul de masa cuadrupolar hibrid cu timp de zbor (QTOF)

3. Tehnica moderna de fragmentare a ionilor prin disociere indusa prin ciocnire (CID) in spectrometria de masa
4. Principiile fizice ale spectrometriei de masa cu mobilitate ionica
5. Aplicatii biomedicale ale metodei ESI MS si CID MS/MS
