

DI.102.HEP Introduction to the standard model of elementary particles

1. Study program

1.1. University	University of Bucharest, West University of Timișoara,
1.2. Faculty	Faculty of Physics
1.3. Department	Department of Theoretical Physics, Mathematics, Optics, Plasma and Lasers
1.4. Field of study	Physics
1.5. Course of study	Master of Science
1.6. Study program	High Energy Physics (in English)
1.7. Study mode	Full-time study

2. Course unit

2.1. Course unit title		Introduction to the standard model of elementary particles						
2.2. Teacher				Călin Alexa, Roxana Zus				
2.3. Tutorials/Practicals instructor(s)				Călin Alexa, Roxana Zus				
2.4. Year of study	I	2.5. Semester	1	2.6. Type of evaluation	E	2.7. Type of course unit	Content ¹⁾	DF
							Type ²⁾	DI

¹⁾ fundamental (DF), specialized (DS); complementary (DC)

²⁾ compulsory (DI), elective (DO), noncompulsory disciplines (DFC)

3. Total estimated time (hours/semester)

3.1. Hours per week in curriculum	4	distribution: Lecture	2	Practicals/Tutorials	2
3.2. Total hours per semester	56	Lecture	28	Practicals/Tutorials	28
Distribution of estimated time for study					hours
3.2.1. Learning by using one's own course notes, manuals, lecture notes, bibliography					30
3.2.2. Research in library, study of electronic resources, field research					30
3.2.3. Preparation for practicals/tutorials/projects/reports/homeworks					32
3.2.4. Preparation for exam					4
3.2.5. Other activities					0
3.3. Total hours of individual study	96				
3.4. Total hours per semester	150				
3.5. ECTS	6				

4. Prerequisites (if necessary)

4.1. curriculum	Quantum mechanics, Electrodynamics, Theory of relativity, Nuclear physics
4.2. competences	Knowledge about: algebra, quantum mechanics, electrodynamics

5. Conditions/Infrastructure (if necessary)

5.1. for lecture	Video projector
5.2. for practicals/tutorials	

6. Specific competences acquired

Professional competences	<ul style="list-style-type: none"> • Identify and proper use of the main physical laws and principles in a given context: the use of the concepts of the standard model • Solving problems of physics under given conditions • Use of the physical principles and laws for solving theoretical or practical problems with qualified tutoring • Rigorous knowledge of quantum field theory, concepts, notions and problems in the area of theoretical particle physics and their interactions • Ability to use this knowledge in interpretation of experimental result and understand experiments at CERN; acquire the appropriate understanding of studied fundamental mechanisms
Transversal competences	<ul style="list-style-type: none"> • Efficient use of sources of information and communication resources and training assistance in a foreign language • Efficient and responsible implementation of professional tasks, with observance of the laws, ethics and deontology.

7. Course objectives

7.1. General objective	<p>Understanding the foundations of structure of the matter: fundamental constituents and interactions between them;</p> <p>Understanding the structure of unified theory of interactions</p>
7.2. Specific objectives	<p>Acquire the skills to describe and calculate the physical properties of elementary particles and their interactions.</p> <p>Understanding the non-perturbative features of symmetry breaking in different situations.</p>

8. Contents

8.1. Lecture [chapters]	Teaching techniques	Observations/ hours
A preview of particle physics	Systematic exposition - lecture. Examples.	4 hours
Lorenz transformations. The Lagrangian formulation of mechanics. The Dirac equation. Free space solutions of the Dirac equation. Symmetries and quarks. Quark “atoms”. Antiparticles.	Systematic exposition - lecture. Examples.	10 hours
Electrodynamics of spinless particles and spin-1/2 particles.	Systematic exposition - lecture. Examples.	14 hours
Bibliography: 1. F. Halzen, A. Martin, Quarks and Leptons, An Introductory course in modern particle physics, John Wiley & Sons Inc., 1984 2. W. N. Cottingham and D. A. Greenwood, An introduction to the Standard Model of particle physics, Cambridge University Press, 2007 3. Particle Data Group - The Review of Particle Physics (2024) https://pdg.lbl.gov/2024/		
8.2. Tutorials [main themes]	Teaching and learning techniques	Observations/hours
Problems specific for each section of the	Problem solving.	14 hours

course.		
Event generators for high-energy particle collisions. Particles collisions.	Guided work.	14 hours
Bibliography: 1. F. Halzen, A. Martin, Quarks and Leptons, An Introductory course in modern particle physics, John Wiley & Sons Inc., 1984 2. W. N. Cottingham and D. A. Greenwood, An introduction to the Standard Model of particle physics, Cambridge University Press, 2007 3. PYTHIA 8, https://pythia.org/manuals/pythia8312/Welcome.html 4. 9. Compatibility of the course unit contents with the expectations of the representatives of epistemic communities, professional associations and employers (in the field of the study program)

This course unit develops some theoretical competences, which are fundamental for a Master student in the field of modern physics, corresponding to national and international standards. The contents is in line with the requirement of the main employers of research institutes and universities.

10. Assessment

Activity type	10.1. Assessment criteria	10.2. Assessment methods	10.3. Weight in final mark
10.4. Lecture	- coherence and clarity of exposition - correct use of equations/mathematical methods/physical models and theories - ability to indicate/analyse specific examples	Written test/oral examination	60%
10.5.1. Tutorials	- ability to use specific problem solving methods - ability to analyse the results	Homeworks/written tests	40%

10.6. Minimal requirements for passing the exam

Attendance of at least 50% for the lectures and at least 70% for the tutorials.

Correct solutions to the indicated subjects for obtaining the grade 5 (10 points scale) from all activities, part of the continuous evaluation.

Correct solutions to the indicated subjects for obtaining the grade 5 (10 points scale) within the final exam.

Date 4.10.2024	Teacher's name and signature Călin Alexa, Roxana Zus	Practicals/Tutorials instructor(s) name(s) and signature(s) Călin Alexa, Roxana Zus
-------------------	--	--

Date of approval	Head of Department Lect.dr. Roxana Zus
